About me

A highly motivated individual with a background in Marketing and E-Commerce, now moving into Front-end Web Development.

Effective at combining creativity and problem solving to develop user-friendly applications. Fast learner who adapts quickly to new challenges. Known among colleagues for strong attention to detail and effective time management. Completed an intensive Bootcamp certificate in Front-end Web Development as commitment to support my career move.

Skills

Technical: HTML, CSS, Javascript, JQuery, Bootstrap, React, Node.js, API, JSON, Git/Git version control, GitHub, VSCode, Next.js, Vercel

Adobe: Photoshop, InDesign, Illustrator, Dreamweaver, Acrobat DC

Microsoft Office: Word, Outlook, Excel, PowerPoint, Teams

Projects

Weather App | [GitHub Repo](#) | [View App](#)

Overview: View the current and forecasted weather for any location using API data.

Tools: JQuery, Bootstrap, moment.js, CSS, localStorage

Code Quiz | [GitHub Repo](#) | [View App](#)

Overview: A multiple choice coding quiz with a countdown timer. Players can submit their scores to save onto a leaderboard.

Tools: Javascript, API, localStorage

Find My Artist | [GitHub Repo](#) | [View App](#)

Overview: A collaborative project, this was built using the Spotify API and a QR code API. Users can search any artist to display their top tracks. The QR code shows further information about the searched artist, whilst localStorage allows for the ability to save the users search history.

Responsibilities: Driving the project, wireframing, CSS

Tools: Javascript, JQuery, API, localStorage, Bootstrap, HTML, CSS, Kanban

Team Profile Generator | [GitHub Repo](#)

Overview: Build a team portal to access colleagues contact info. The app displays a series of prompts for the user to add team members using the terminal. Once complete, a HTML file is generated displaying all the data provided.

Tools: Node.js, inquirer, Javascript, HTML, CSS

More projects can be found on my GitHub page!
